

GAIA-Apron™

Article nr GAP1259036620100

WHY GAIA-APRON™

GAIA-Apron™ is made from Biodolomer®, the environmentally lenient material developed in collaboration with the EU. The mission, to create an alternative to fossil-based plastics. Biodolomer® is fully compostable at ambient temperatures and produces no microplastics.

In other words, a joint venture to help save our planet.

THE RESULT

1. Up to 80 % reduction of fossil CO² emissions during incineration
2. No microplastics is created after composting
(Biodolomer® compost process is certified by TÜV)
3. Substantial savings of fossil raw materials in production
4. Odor-free product without dangerous chemical additives
5. Food contact safe and manufactured without direct human con-

OTHER BENEFITS

- Made in Sweden
- Meets EU and the UN's "Guidelines" to minimize use of Earth's finite resources.
- Recyclable, part of the circular economy.
- Create a humane world for our children and subsequent generations.
