

## Biodolomer® T – recommended end-of-life options

To whom it may concern.

GAIA BioMaterials offer a number of different Biodolomer® grades for thermoforming applications, such as drinking cups, plates, trays, pots, etc. These Biodolomer® grades are certified for industrial composting in thicknesses up to 1000 microns:

*Industrial composting:*

Din Certco registration no: 7W0335 (seedling)

Din Certco registration no: 9K0055

The recommended end-of-life options for products made from Biodolomer T – depending on material thickness – are thus as follow:

- Industrial composting (up to 1000 microns)
- Other Household waste (marked “7”)

Helsingborg, September 4<sup>th</sup>, 2023
