

Biodolomer® I – recommended end-of-life options

To whom it may concern.

GAIA BioMaterials offer a number of different PLA-free, mineral filled Biodolomer® grades for injection molding applications, such as cutlery, jars, caps, lids combs, etc. These Biodolomer® grades are certified for industrial composting in thicknesses up to 1000 microns:

Industrial composting:

Din Certco registration no: 7P2102 (end products)

The recommended end-of-life options for products made from Biodolomer I – depending on material thickness – are thus as follow:

- Industrial composting (up to 1000 microns)
- Other Household waste (marked “7”)
