

## Product information:

# Animal Origin Statement on Raw Materials

Based on supplier statements and our own research GAIA products are – unless clearly stated for the individual grade – not of animal origin and do not contain, make use of, or involve, at any point of their manufacturing processes, raw materials of animal origin, including animal proteins. GAIA stores any products of animal origin, including animal proteins, separate and clearly marked in its manufacturing facility and warehouse.

Thus, to the best of our knowledge, based on research conducted on our raw materials, and the processes used to manufacture our products, Biodolomer compounds are free of animal derived materials.

These raw materials can be identified by the declaration of the respective suppliers of each material. Certificates of Animal Origin from our suppliers are available upon request.

This document is a statement of our knowledge based on our research, and 1<sup>st</sup> tier supplier statements, true to the best of our knowledge, at the time of its writing. While unexpected, it is possible that the validity of the statements in this letter could change without notice.

Yours sincerely

Konrad Rosén, R&D Manager

GAIA BioMaterials AB
