

Biodolomer F - Printing & Printability Declaration

Dear Sir / Madame,

Below, please find GAIA BioMaterial's declaration concerning the printing and printability properties of our Biodolomer F grades in film format:

- No corona treatment of film prior to printing needed, but fully possible
- Excellent printability properties
- Print with 8 colours or more possible
- The Calcium Carbonate in Biodolomer F absorbs the paint, resulting in less smudging
- Works excellent with both offset and flexo printing

Helsingborg, December 22nd 2021
